SPIN

The Future

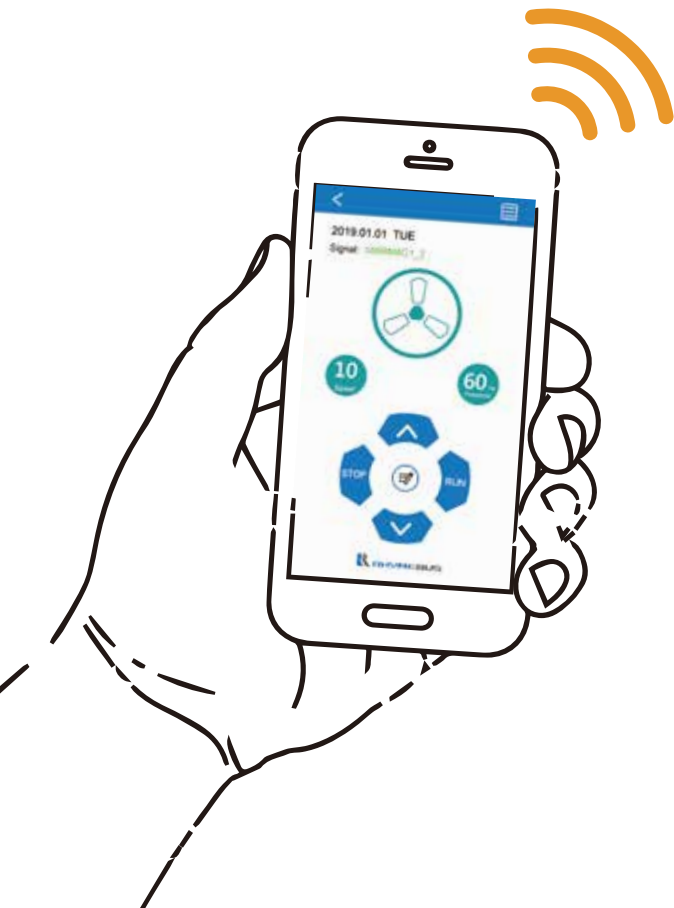

The Rhymebus Solution

OUR VISION

We choose Bluetooth as our communication protocol because we've discovered small horse power devices such as fans, pumps, conveyor systems and food packaging machines require only small data monitor and control, that's the reason why Bluetooth truly shine. Besides, this solution provides more privacy and cost advantages than entire cloud-based solution.

Furthermore, this App that pairs with Bluetooth Module is a well-designed solution, there is no need to set up IP or any wiring but just plug the Bluetooth module in the drive and run your whole system with ease.

FEATURES

Advanced Control

Advanced Control could help users connect the devices 33% faster and ensure the safety when you adjust the device. Safety always comes first.

Automatically Backup

With this application, you can easily restore your parameters setting whenever you need it.

Swift Parameters

Through our cutting-edge method, you could store your frequently used parameters as a group to make your operating process efficiently. Besides that, you can adjust the preset speed on the main page with a glance.

Plug and Run

This solution is a well-designed module. You can just plug the Bluetooth module in the drive and immediately benefit from it.

RhymeCare

Our teams are enthusiastic and professional, if you have any kind of problem we can help you solve it in no time.
