

Monitoring & Management without borders

In the coming future, we can monitor these devices in office. Meanwhile, the data will be automatically uploaded to cloud system. Rhymebus believe our solution can build a cleaner and higher effeicent world.

**We strive to provide
The best solution for
energy efficiency and
environmental protection**

Water Pump

Develop a Better World With You

Before, one keypad is with one drive.
From now on, one **APP** links ALL drives.

User friendly interface.

Simple and clear display.

Record the energy consumption rate for customers to optimize the usage of our products.

The App can help customers write an email and send to our customers services department in 3 minutes.

Future blueprint

Quick Setting

Different from traditional Controller, we are developing a program to help you set up the devices in 5 minutes.

Revolution of Customer Services

We are now developing a semi-Ai system to solve the technical problems. In the future, end-user can easily send their error reports to region retails through the system.

Optimization

We are developing a program to optimize the devices with just a click of button.
